### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 1, line 36, delete "rotation", insert "--rotations--".

The amendments are made solely to correct grammar for consistency.

### ***Allowable Subject Matter***

2. Claims 1, 2, 4, 6-8, and 12-16 are allowed.

3. The following is an examiner's statement of reasons for allowance: With respect to claims 1, 2, 4, and 8, the prior art of record does not disclose that the liquid run out section is formed as a speed reducer which makes the bar coating device into a state of running out of the liquid by reducing the number of rotations of the undercoating bar, in the context of claim 1, which requires an upstream-side and downstream-side coating section, and undercoat liquid coating section.

With respect to claims 6 and 7, the prior art of record does not disclose the claimed signal output section, calculating section, or control section, in the context of

Art Unit: 1734

claim 6, which requires an upstream-side and downstream-side coating section, and undercoat liquid coating section.

With respect to claims 12 and 13, the prior art of record does not suggest the speed reducer that reduces a rate of the coating of the undercoat liquid onto the base material by reducing a rotational speed of the undercoating bar, in the context of claim 12, which requires an upstream-side and downstream-side coating section, and undercoat liquid coating section.

With respect to claims 14-16, the prior art of record does disclose a speed controller arranged to control a rotational speed of the undercoating bar, the speed controller being constructed and arranged to terminate transfer of the undercoating liquid to the base material by reducing the rotational speed of the undercoating bar without terminating rotation of the undercoating bar, in the context of the other limitations of claim 14, including the first, second and third coating means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
